#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because it contains greater than 150 words. Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Melsky et al. (U.S. Patent Number 5,147,483). Melsky discloses an implantable infusion device with an access port. Melsky discloses an access port (10) comprises a housing (67, 20)

Art Unit: 3767

with a first opening (80), a septum (50) mounted with the housing, and attachment portion with a chamfer, and a second opening (60) that can connect to a catheter (see figures 1, 2, 3a, 3b). Further Melsky discloses a septum seat (92, 40) formed by a housing and an attachment portion, which compresses the septum between. Melsky discloses a chamfer attachment portion that comprises a least one surface angled relative to the operative surface that forms a 45-degree angle and a stepped surface (see figures 3A and 3B). Further the Melsky patent discloses a chamfer attachment portion comprising a curved fillet (20) with a substantially constant radius of curvature and an annular portion abutting a septum seat of the housing (90, 92). Melsky discloses a substantial planar compressed membrane operative surface (50) (that permits penetration and reseal by a needle) overlying the first opening, with a dimension greater than the first opening dimension. Further Melsky discloses that the chamfered attachment portion redirects a portion of the force to compress the outer surface and is subject to a force oriented substantially perpendicular to the plane of the outer surface (see paragraphs beginning at column 5, line 51 through column 4, line 30). Melsky also discloses that the operative surface is formed of a flexible polymeric material (see paragraphs beginning at column 5 line 16).
